ABOUT ME

I am a real enthusiast of IT, working in the industry since 2013. Proven to be creative, innovative team-player, experienced in planning, developing and managing robust frontend web apps. I am a natural born multi-tasker, focused on code quality and always keen on learning new technologies.

EMPLOYMENT HISTORY

Senior Frontend Developer Ortto

Sydney, Australia

Oct 2019 - Jul 2023 (3 yrs 10 mos)

Part of the core frontend team responsible for building the new version of Ortto app - robust and scalable marketing automation software.

- Working closely with design and PM teams on UX/UI improvements, planning, developing and implementing new features with React & Redux.
- Taking ownership, developing and maintaining multiple complex segments of the app using different technologies and solutions:
 - Robust reporting and dashboard part of the system (Google charts)
 - Capture displaying widgets and collecting data from customer 3rd party websites (Pure JS)
 - Playbooks & Journeys (intuitive visual marketing automated solutions)
 - Push notifications (iOS, Android, MacOS, Windows push implementation)
 - Actively bug-fixing existing issues and brainstorming potential new features
- Onboarding and mentoring new employees, sharing knowledge of the project and the application

EDUCATION

Computer Science

University of Gdańsk,
Poland

Oct 2009 - Jul 2012

Graduated in
Computer Science in
2012 specializing in
Web apps and
database engines. Got
to know the basics of a
lot of different
technologies such as
Java, JavaScript, Perl,
Ruby, Rails, Node.js.

Frontend Developer

Just Join IT / RocketJobs

Gdańsk, Poland

Jan 2018 – Oct 2019 (1 yr 10 mos)

Part of the founding development team in the biggest and fastest growing tech job board in Poland. I built functionalities that fuelled company to grow and become nominated for multiple Polish startup awards.

- Planning and developing new functionalities with React, Redux and AngularJS
- Part of the team responsible for rewriting the whole service from AngularJS to React
- Took a vital role in designing the layout and planning frontend UI directly with the graphic designers
- Creating landing pages for marketing department (HTML, CSS, JS, Wordpress)
- Responsible for onboarding new developers joining the company
- Resolving technical issues for team members

Freelance Web Developer

Self-employed

Gdańsk, Poland

2015 - 2018 (3 years)

As a Freelance Web Developer I was working on various projects from the stage of acquiring own clients, through discussing projects scope and requirements until developing and maintaining them afterwards.

- Working closely with individual and corporate clients on developing web pages from the project stage up until production application
- Maintaining and upgrading/fixing existing pages
- Turning designs into aesthetic and user friendly websites
- Technologies used: HTML, CSS, JS, JQuery, Wordpress, Prestashop, Joomla

Software Tester

Travactory N.V.

Gdańsk, Poland

Jul 2013 - Dec 2014 (1 yr 6 mos)

First Software Tester in the biggest flight search engine company in the Netherlands. I was responsible for creating and executing test strategies and cases including test automation.

- Working closely with developer team maintaining the highest quality of released software
- Creating and updating automated tests with Selenium and Ruby
- Technologies used: Ruby, Selenium, Jenkins, JIRA, Trello, Confluence, Browserstack
